Introduction

First of all thanks for buying the brand-new, revolutionized **Click N Bank**. I promise you that you won't regret it!

I admit that we put a ridiculous amount of time and effort into creating this one of a kind Click N Bank script

Trust me, once you have gone through the Click N Bank blueprints and set the script up, I am totally confident that you will quickly realize just how advanced this new instant viral affiliate page builder script is...

It might sound like hype or B/S but if so, all I ask is that you reserve judgment until you fully understand what you've got here.

In the **training manuals**, I am going to take you by the hand to walk you step-by-step through everything you need to know about CnB.

By doing so, I will make this thing childishly simple, something that anyone – even the greenest beginner – can set up and run with a minimum of fuss or bother.

Just do as I say and you will be fine.

One thing I would stress is that this CnB system has been tested, tested and tested again. We've finessed it, tweaked it and played with it to such an extent that I know with total confidence that this system works like a charm.

My job is to make sure that you make you some money with CnB. If you follow what you read in these instructions to the letter, this is exactly what will happen.

Before diving into the core of these training materials, I will first tell you something about what CnB is, why we made it and how we have used it.

Hopefully, the better you know us, the more you will begin to have absolute confidence that we do know what we are doing...😊

What is Click N Bank?

It's a totally unique ready-to-go instant viral affiliate page creator...

Before we go any further, I want to make sure that you know what the Click N Bank script is and why it is so special, pretty much unlike anything else available anywhere else on the net at this moment. So, let's start with the most basic description of what overall Click N bank is.

There are **two distinct components** to the overall Click N bank 'package' that between them make up one of the most complete and original online marketing packages on the market.

The **first** component of the package is the Click N Bank script itself which is the first web-based click-easy instant viral affiliate page creator online.

Our team invented the idea, designed it and developed it from start to finish. The script was completely made with the "newbie" in mind.

Once the script is setup, just follow the few easy steps, step-by-step, upload/enter info and hit "create page". That's it.

The second component is a complete online marketing training course that I have spent a lot of money having created so that it dovetails with the first part of the package (the script) perfectly.

While products that come with a bare-bones 'workshop manual' are ten-a-penny, the Click N Bank training materials go so much further.

They teach you how to make money with this script from the ground up, so you literally have everything you need here either to take your online marketing efforts to the next level or to launch your career from a standing start!

What makes the Click N Bank project so different?

We have one central goal with all our marketing efforts:

You don't have reinvent the wheel.

Our Click N bank script was designed and developed with this idea in mind. We and a lot of other marketers/websites have tested everything already, we know what converts and what doesn't. We know how to

build small high converting affiliate pages, we know what elements to put in it and where to place it...

This being said...with this knowledge in mind...we developed the Click N Bank script. A one of a kind script to crank out small affiliate pages following a special logic (all features will be described in a later manual). Think of pre launch pages, bonus pages, squeeze pages, small affiliate pages...

We tested **everything carefully** and had a good look at the success elements of well known sites...like facebook and youtube.

The viral elements that skyrocketed the success of these sites are designed and developed within the script in a click-easy fashion as well.

Make your pages viral with a click of the button, enable share buttons for the biggest social sites or enable a superb commenting system like Youtube has. **It's all covered within the Click N bank script!**

We have all seen those MAGIC BUTTON desktop software programs that promise you \$MILLIONS, simple install and watch the money roll in....

I guess you might have even bought some of these software programs and found out that they make you more like \$0 instead of \$Million.

Let me tell you...even the creators didn't make \$Millions with their own software...BS.

No way...our system is no "shitty" software application. Our system is a real web based script that has to be installed on a domain. Our script is **truly unique** and click easy and WE are using it daily as part of our \$250,000+/Month business.

Whether it is to setup an instant viral squeeze page, bonus page or as part of a huge launch.

The exact same script was actually part of one of **our latest launches** that sucked in over \$350,000+ the first week alone.

Wow seems like a great program. Yet everything on line seems to take money yet then we get no traffic. I hope your system proves us wrong!

Our slice of the cake...

This script can do the heavy lifting for you and can be used in endless different ways. We are sure it will soon be one of the most used and powerful marketing weapons in your arsenal!

You need to do only one thing...

To begin with, CnB constructs your sites with a few easy clicks of the mouse and we have included a full web-based installation program in the system.

All you need to do is create a database (and I will show you how to do this) and punch in two or three lines of information. That's it, the installation is complete.

When you want to add new pages to the site, it is completely pushbutton simple to do so.

Good luck installing and using our Click N Bank script!

..oh I almost forgot one important part!

The Click N Bank script is build with different purposes in mind. Besides using it for your own use to build your own instant viral pages you can also offer it as online service.

That's why the Click N Bank course with **2 script tutorials**. One for the control panel (to manage all pages, settings and look of the script) and one tutorial for the use of the script itself.

The front end design is web-based and build in a way that others can make use of it as well. Invite people to make use of your script and make extra money with banner advertising on top and at the left.

All ads are fully manageable from the control panel, it's all point and click (or copy and paste:), you never have to work with code.
