PROJECT: CHA CHAS KITCHEN A/C REPAIR

We hereby submit specifications and estimate to:

Provide and install a double application of A/C Easy Seal (by Nu-Calgon) in each refrigerant circuit on the kitchen a/c unit, and add R-22 to bring the refrigerant charge on both circuits to full.

Price.....\$700.00

Price to include: Labor and R-22 refrigerant.

Price does not include: A guarantee of success.

Note: I have had pretty good results using Easy Seal on R-22 systems but due to the nature of this type of repair I cannot guarantee the results. I will say that on systems we have been able to seal with this product; the repairs have held up over time.

Thank you,

Robert Campbell,
B.T.S., Inc.
